Mattson Aspen II CPU New PN 559-08442-JVT

Details

Introducing the all-new 559-08442-JVT CPU BOARD – a seamless replacement for the hard-to-find 1005146 CPU BOARD, A2 366MHz Celeron with 128MB memory. No more struggling to source alternatives; our innovative CPU board is designed to effortlessly replace the original without the need for any alterations.

- Processor: A2 300MHz Celeron
- Memory: 512 MB RAM
- Storage: Compactflash hard drive
- Operating System: QNX 2.21

Experience a smooth transition with our CPU board, delivering performance on par with the older model. Enjoy the same reliability and efficiency without the need for modifications.

Optimize your system with 512 MB RAM, ensuring efficient operation and a smooth computing experience.

Upgrade effortlessly with plug-and-play design, maintaining the same size for installation. No need for modifications. our CPU board seamlessly replaces the old for a swift and hassle-free upgrade.

Rest easy with our CPU board sourced directly from our manufacturer, adhering to the same high standards as the original for reliability you can trust.

Benefits

- Plug and Play installation
- Very reliable up-grade
- Installation procedure available
- Installation on-site available
- Technical support available
- Proven reliable at many customer sites
- Continuous support
- More Ram Memory
- Operating System Pre-installed
